Dust jacket notes: "In May of 1968, a team of American medical doctors arrived in a small plateau village of Brazil with extensive modern medical equipment to study a peasant named Arigo, whose cures and surgery had been reported to be nothing short of miraculous! What they uncovered was a story that defies belief and yet it is a true story. This is the documented account of a man who cured hundreds of thousands of sick and dying and yet was prosecuted by the government under which he lived and ostracized by the church in which he fervently believed. This is the strange and wonderful story of Arigo - one of the greatest healers of all time. Arigo had only a third grade education and no medical training whatsoever, yet thousands flocked to the small village where he lived from all over Brazil and South America, indeed from all over the world, to be cured by him. He performed hundreds of operations daily without antiseptics - usually with an ordinary kitchen knife or jackknife - without anesthetics, without tying off blood vessels, without major bleeding, without any of the benefits of modern science. He made thousands of correct diagnoses without even examining the patient. He wrote thousands of prescriptions which were pharmacologically accurate but in unusual combinations and potency. And, one after the other, patients left his primitive 'clinic' cured. He saved many with cancer and other fatal diseases who had been given up as hopeless by leading doctors and hospitals in many of the most advanced countries. He performed the most excruciatingly painful procedures without any discomfort to the patient. Among those he healed were the educated, famous, and wealthy as well as the poor and desolate. He never charged for his services or would accept any remuneration. Arigo's healings were witnessed by both Brazilian and American doctors. Among the latter was Henry K. Puharich, M.D., leader of the American team, who has written an afterword for Arigo...."

through our superior intellect empowered by God [through His evolutionary process] brilliant ...

By bsbuster

I have read non-fiction my whole life almost exclusively, because well researched truth is so much more fascinating than any fabricated tale. I read the condensed version of this book in Reader's Digest more than 40 years ago and had the incredible pleasure of reading the real book later; it forever will remain the most spell binding nonfiction work I have ever read!

Two American medical teams fully researched and documented Arigo's out-of-this-world skills as a surgeon [with hardly any education to his credit]; they were simply baffled and could not explain the phenomenon. How could they? It could only be explained through Arigo's supernatural powers that were given to him by Jesus Christ whom he invokes and prays to, which is also well documented in the book.

Why is that, when the Medical Science establishment hits a brick wall [as in Arigo's case] and cannot explain certain human phenomena, they cannot admit the existence of a supernatural power [or God forbid, a G-O-D]? Instead, they dismiss off such occurrences as "freaks of nature" or voodoo, in their sheer arrogance. I am a retired physician and I am proud of my profession [though sadly, the whole landscape has changed over the past twenty years mainly from overzealous bureaucratic and technological regulations and oversight] and time and again, I was witness to "unknown" miraculous powers and happenings albeit on a much smaller scale compared to Arigo, that convinced me that there is a God overlooking the workings on this earth and extending His influence to the infinite reaches of the universe. We humans have been trying to "understand" and/or "fix" things that go wry; not to mention and give credit where it is due, through our superior intellect empowered by God [through His evolutionary process] brilliant inventions and innovations over the centuries, that have made our lives easier to live. Still, there is much that we don't know and as Gandhi so well put it, "God is beyond human comprehension". For us humans, trying to understand God's creations and plans, is like an amoeba trying to understand and explain man's works and thoughts! "How arrogant of the amoeba", wouldn't we say?

Hey skeptics, look him up on Y-tube; you will be left speechless as I was!

A Real Enigma, Yet a Real Prodigy - Salud Ze Arigo

By Bobbananda - Dr Bob

An excellent depiction of the work of the Psychic Surgeon, Ze Arigo. Fuller pulled no punches and left no areas of investigation unfollowed. It is interesting to note that the official researchers of Arigo never thought to address him while in trance as Dr. Fritz about how the extraordinary healing work was done.

The book delves otherwise into many directions yet left this reader wanting to read more. Even while there was not much left to me said from this side of the veil.

Highly recommended for those exploring the divide.

Too many people have not read this book.

By James Ashley Shea

In an otherwise marvelous New Yorker magazine article/book review, Adam Gopnik says one wrong thing: ". . . there is no evidence of a single miraculous intercession with the laws of nature."

Gopnik has never read about Arigo. I am heartened to see recent reviews. Spread the word! Oh, and google Arigo. You will find an excellent video. And the whole book is free to read on another site.
