Very Good book for orthopedics class and chiro boards

By A Customer

This was a recommended text in my chiropractic college for my orthopedics class. I found the illustrations very helpful with learning the orthopedic tests which seemed so overwhelming at first. I kept practicing these tests with my friends before the lab test and got good grades. The national boards do use this text as a reference, I highly recommend using this book to study for the boards for either Part II, III, or IV. For x-ray portions of boards -more so in Part III and IV---I highly recommend Skeletal Radiology by Terry Yochum. This is a definite must buy as well as Patrick Leonardi's National Board of Chiropractic Part II, Part III and Part IV study guides. The questions were great and helped me to concentrate on the important topics of high yield questions asked on the boards. Thanks Terry Yochum, Patrick Leonardi and Ronald Evans for making my life much easier in chiropractic school and on the boards.

Used for NBCE national boards

By Bad Rad

Would never have purchased this text if it were not for National boards. The DVD is very useful when reviewing Irene Gold review material. However, when you take part 4 you are not sure if the examiner is up on this text or some other. Numerous ortho exams are completely useless. And same-named ortho exams are taught/done differently depending on which text is used. Why NBCE, CCE, and the DC colleges are not on the same page is a mystery. I can only guess that it has to do more with money than with factual education.

I was taught from the Magee text. I'm not sure if I'll keep this text or resell it. I looked at this purchase as cheaper than repeating part 4.
