Rip off

By Wulfgaar

I bought this item along with the "In Quest of the Stars and Galaxies". Both books are just the first few chapters of "In Quest of the Universe" and some other chapters that are specific to either the solar system or stars and galaxies. Even if you look at the table of contents on either item you will notice the chapters and page numbers jumping around. These were supposed to accompany the original text, which is impossible seeing how they are copied and pasted versions of the original text. Zero new information! Save money and just buy "In Quest of the Universe" (which is a great text in itself!)
