VACCINE ILLUSION BY TETYANA OBUKHANYCH PDF

Due to the growing number of vaccine safety concerns, our society has been polarized into vaccine advocates and vaccine opponents. However, in the debate over vaccine safety, we have lost sight of a bigger problem: how vaccination campaigns wipe out our herd immunity and endanger the very young. Written by an immunologist, Vaccine Illusion explains why vaccines cannot give us lasting immunity to infectious diseases and how they jeopardize our natural immunity and overall health.

About time!

By JT

I would like to personally thank this author for stepping up to the plate and giving us all a real look at the inner workings of vaccination and the complications that arise from its overuse in today's world.

Being a paramedic for over ten years, I saw first hand many of the vaccine related injuries spoken of in this book (and some that were not), & I am sick of second & third year medical students in an ER telling families that "your child must have had some kind of response to a virus", when there is an absence of any other explanation for the child's condition on presentation at the ER except for it being post vaccination.

Doctors continue to see themselves as a high authority, yet to continue be taught only what pharmaceutical companies want them taught. For the sake of our kids and future generations, I hope this stops one day soon. Credible books like this one will help that cause.

So, thank you to the author, please continue to spread the word & I will continue to promote your great work!

Excellent!!! Very clear and concise

By Alirio J. Zavarce

Once I started reading this book, I couldn't stop. Excellent explanations in layman terms of the state of affairs of the vaccination tyranny implemented in the US. After you read this book, you will understand why vaccinations are a failure.

NOW . . . The HONEST Truth about VACCINES!

By Jesse Carnes

Dr. Tetyana Obukhanych is an immunologist. Despite her PhD credentials from Rockefeller Univ in NYC, and post-doctoral credentials from Harvard and Stanford, she speaks very clearly, even lucidly to the everyday reader. Admittedly, she states that immunology is an ". . . ivory tower" discipline, but she moves beyond that candid and honest statement, by showing HOW the 21st century populace became "married" to the concept of Vaccines, and then shows the fallacy in the concept, itself, and the inability of the concept to produce on its own promises. This is because of Primary and Secondary Vaccine failure, and the inherent ingredients which pose a Genuine Threat to the Life and Health of vaccine recipients of the 21st century.

Additionally, in this 50+pp brief tome, Dr Tetyana shows the failure of Vaccine Immunity v. Natural Immunity, and the inherent dangers which come with the CURRENT Vaccine Schedule: the Mercury [as a preservative] in many vaccines [especially Flu vaccines]. One thing the reader notices about Dr. Tetyana is that like Dr. Andy Wakefield (UK), Dr. Russell Blaylock (Ret. Pediatric Neuro-Surgeon), Dr. Suzanne Humphries, and Dr. Kelly Brogan (NYC physician), is that THESE academicians are ASKING Questions. Dr. Tetyana wants Truth to prevail, especially when an adult or child's life and health are at stake.

Dr. Tetyana advocates FULLY-INFORMED CONSENT on the part of parents, especially and by patients in general. Much of the mainstream Medical Community and Mainline-Media BALK at much of what Dr. Tetyana advocates in this book, but of course they have good reason: PROFITS. Like few physicians and PhDs, Dr. Tetyana is honest and money is never FIRST, as it tends to be the case among the majority within the Gargantuan Pharmaceutical field. The pharmaceutical field is a morass where Clarity of Information has become increasingly obfuscated and even esoteric.

Point: This book is not for those who want to feel GOOD about the current state of medical-affairs within the USA-Medical Community. This book is for those COURAGEOUS Readers who want the Truth ... the unvarnished, honest and Naked Truth. Sad to say, most people do not want to be Confused by the FACTS. Accordingly, this book is NOT for them.

I LIKE this book because there are still SOME good physicians and academicians who want TRUTH at all costs, and CARE about their patients more than ACCOLADES and PROFITS. This book will appeal for those who want CANDOUR and Helpful, but sometimes disturbing Data about the Medical World in the West, as it currently stands. Dr. Tetyana is on the patient's side, on the Parents' side, and especially on the children's side. This book exudes Honesty, which is refreshing, and real honesty gets Specific, which was her motive all along.
